PROFESSIONAL SUMMARY

Final-year Information Technology student majoring in Software Engineering with a strong interest in software and mobile application development. Although I do not have professional experience as a Software Engineer, I have been actively involved in web and mobile application development projects throughout my university studies. Experienced in using Flutter, MySQL, Spring Boot, and Angular to design and develop academic projects, with a solid foundation in software development principles. Seeking an opportunity to apply my technical knowledge while gaining industry experience in software engineering.

EDUCATION

Bachelor of Science (Information Technology) – Majoring Software Engineering

Universiti Utara Malaysia (UUM) | 2023 – 2027 | Current CGPA: 3.41

Foundation of Management

Pusat Asasi Pengurusan Universiti Utara Malaysia | 2022 – 2023 | CGPA:3.55

TECHNICAL SKILLS

Programming language: Dart, Java, Javascript, PHP, HTML

Tools: Github, MySQL, Visual Studio Code, IntelliJ, Figma

Framework: SpringBoot, Angular, Flutter

Testing: Manual testing, Functional and non functional testing, usability testing, test case design

Automation: Cypress

WORK EXPERIENCE

SOFTWARE DEVELOPER (PART TIME) | Softedge System | Seremban, Negeri Sembilan

July 2025 – September 2025

- Supported the development of several modules for an Expense Application System for a corporate client.
- Assisted in web application development using Laravel, React.js, and MySQL.
- Worked with the development team to implement features and fix issues.
- Gained practical experience in full-stack web development, including frontend and backend integration.

PROJECT EXPERIENCE

Faraid A-Z Mobile Application | Flutter | Dart

- Developed a mobile application to educate users on Islamic inheritance (Faraid) and assist with inheritance distribution calculations.
- Designed an intuitive and user-friendly interface with both text and infographic learning modes.
- Implemented features including a Faraid calculator, educational content, FAQ section, bookmarking, and inheritance distribution guidance.
- Focused on creating an accessible and interactive learning experience for users.

Conference Management System | Spring Boot | Angular | MySQL

- Developed a web-based conference management system for managing paper submissions, reviews, scheduling, and user administration.
- Built RESTful APIs using Spring Boot and integrated them with an Angular frontend.
- Designed and managed the MySQL database for storing conference, paper, and user information.
- Implemented responsive interfaces and performed frontend-backend integration.

Software Testing Automation | Cypress | Allure Report

- Developed automated end-to-end test cases using Cypress for web application testing.
- Generated and analysed test execution reports using Allure Report to identify defects and verify application functionality.
